

TALLYGENICOM GROWS INDUSTRIAL PRINTER FAMILY

New Additions to Deliver Crucial Documents at Low Running Costs

TallyGenicom, a leading provider of focussed business printers, today announced that it will be launching four new additions to its dot matrix printer family in February. The new additions include the high speed 2365 MC, 2380, LA48N and LA48W printers. Each of the printers is designed to deliver mission critical documents in the most extreme conditions seen in today's warehouse and finance environments.

The 2365 MC is the ideal solution for organisations looking to easily process heavy workloads. It is capable of processing forms with up to nine parts, perfect for logistics and industry operations where multiple forms are used for various vital and time sensitive operations, such as invoicing and the production of delivery notes. The 2380 is capable of print speeds of 1000 characters per second (cps) and can process up to 50,000 pages per month. TallyGenicom has also improved the print head life within the printers, to ensure continuous printing for high availability applications at low running costs.

The LA48W and LA48N are capable of high print speeds and so are best suited to applications that are vital for the day-to-day running of a business. The LA48W will reach print speeds of 448 characters per second (cps) with the LA48N offering 400. Both models are true workhorses, designed for a broad spectrum of applications and specially optimised for the DEC® environments. The LA48W and LA48N also support DEC®ANSI, IBM® ProPrinter® X24E and Epson® ESC/P2 emulations

“We are delighted to be growing our dot matrix printer family. TallyGenicom now has a robust portfolio of dot matrix printers compared to our competitors. This unique position enables us to meet customer requirements and deliver results without fail,” says TallyGenicom Product Manager, Torsten Franz. “All the printers fit ideally in finance, manufacturing and logistics operations and fit in with existing legacy systems, which reduces often costly software overheads.”

About TallyGenicom

TallyGenicom is one of the largest companies in the world focused exclusively on supplying computer printers, supplies and service to commercial and industrial users. All TallyGenicom products are designed and manufactured to perform critical, business-specific printing tasks in industries such as healthcare, transportation, manufacturing, warehousing and retail.

Major international corporations such as Wal-Mart, American Airlines, Tesco, Daimler Chrysler, Blockbuster and Volkswagen use TallyGenicom® printers because of their customised design, rugged construction, proven reliability and durability.

TallyGenicom worldwide headquarters are in the United States in Chantilly, VA near Washington DC with manufacturing based in Reynosa, Mexico and Jiangmen, China. Its EMEA headquarters are in Basingstoke, UK with a further logistics and repair centre in Ulm, Germany. Other key offices are located in Singapore, Beijing, Dubai UAE, and Johannesburg. The company markets Tally®, Genicom® and TallyGenicom® products worldwide.
