

TALLYGENICOM INTRODUCES ITS FLAGSHIP MONO LASER PRINTER

Feature rich 9050 model designed to ease administrative headaches

TallyGenicom, a leading provider of focussed business printers, today introduced the launch of its flagship mono laser printer, the 9050. Shipping January 28th, the 9050 is equipped with a powerful 533Mhz processor incorporating Intelliprint Architecture and has 256Mb of memory to deal with the most demanding jobs in the office. Capable of achieving print speeds of up to 50 pages per minute, the 9050 will be the foundation of a busy corporate office.

With up to six input trays to hold a variety of paper sizes, types and weights including transparencies, the 9050 provides print runs of 300,000 pages per month, making it a true workhorse for the office. It has also been designed to ease administrative headaches, making document preparation and distribution easy due to its unique collate, staple and hole punch option.

The 9050 also carries TallyGenicom's Intellifilter software, allowing it to automatically trigger forms, and effectively eliminating the need for expensive software solutions. TallyGenicom has ensured that the printer meets the expectations of the busy corporate office, by adding a web-based performance-monitoring feature as standard on the 9050.

"The 9050 has been designed as the cornerstone of any printer fleet," explains TallyGenicom Product Marketing Manager, Duncan Vass. "It can easily cope with immense workloads and through its quick print speeds, is suitable for large workgroup use. It can deliver significant benefits in the collation of vital meeting materials and provides a unparalleled solution for mission critical printing tasks."

The 9050 is part of TallyGenicom's unique Lifetime Warranty offer, effectively extending the warranty of the 9050 to five years, or the service life of the printer, which in case of the 9050 is a staggering two million pages. Users can register for the lifetime warranty offer at www.tallygenicom.co.uk

The 9050 is available now from: £1,999

About TallyGenicom

TallyGenicom is one of the largest companies in the world focused exclusively on supplying computer printers, supplies and service to commercial and industrial users. All TallyGenicom products are designed and manufactured to perform critical, business-specific printing tasks in industries such as healthcare, transportation, manufacturing, warehousing and retail. Major international corporations such as Wal-Mart, American Airlines, Tesco, Daimler Chrysler, Blockbuster and Volkswagen use TallyGenicom® printers because of their customised design, rugged construction, proven reliability and durability. TallyGenicom world-wide headquarters are in the United States in Chantilly, VA near Washington DC with manufacturing based in Reynosa, Mexico and Jiangmen, China. Its EMEA sales, marketing and finance are based in Basingstoke, UK with EMEA logistics centre in Ulm, Germany. Other key offices are located in Singapore, Beijing, Dubai UAE, and Johannesburg.
